

# Amendment to the Internet Union to Join Oflen Proposal

This amendment to the proposal was brought to the King's attention by Congresswoman A.P. She thought there should be a way out of a potential bad situation if one arises. She is right. This is a partnership that is happening between mostly anonymous people on the internet. Therefore, to bring security to this agreement, an amendment is needed for the proposal.

## Article III: Emergency Protocol

In the case of an emergency, such as an insurrection or attempted passing of an unconstitutional law, an emergency protocol is needed for dire action. The king has the following power in the instance of serious emergency; to re-split Oflen and the Internet Union. If this were to happen, the following would occur:

- A. Oflen would no longer recognize that the Internet Union is part of Oflen.
- B. The Internet Union to Join Oflen Proposal would no longer be in effect.
